he Milltronics Single Idler Belt Scale (MSI) is one of the most advanced single idler belt scales available. It provides continuous in-line weighing on a variety of products in primary and secondary industries. It is proven in a wide range of tough applications from extraction - in mines, quarries and pits - to power generation, iron and steel, food processing and chemicals. The MSI is suitable for monitoring such diverse products as sand, flour, coal or sugar.

The MSI's patented use of parallelogram style load cells results in fast reaction to vertical forces, ensuring instant response to product loading. This enables it to provide outstanding accuracy and repeatability even with uneven loading and fast belt speeds.

Operating with one of Milltronics' microprocessor-based integrators, the MSI provides indication of flow rate, totalised weight, belt load and belt speed of bulk solid materials on a belt conveyor. A Milltronics speed sensor monitors conveyor belt speed for input to the integrator.

The MSI is installed in a simple drop-in operation and may be secured with just four bolts and an existing idler set, secured to the dynamic beam. With no moving parts, maintenance is kept to a minimum, with just periodic calibration checks required.

Product Features

- Outstanding accuracy and repeatability
- Unique parallelogram style load cell design
- · Fast reaction to product loading
- Capable of monitoring fast-moving belts
- Rugged construction

Technical Specifications

Accuracy

± 0.5% of totalization over 5 to 1 operating range

Belt Width

• 18" to 96" in CEMA sizes, 500 to 2000 mm in metric sizes (refer to Outline Dimensions section)

Belt Speed

• up to 4 m/s (800 fpm)

Capacity

up to 5000 TPH at maximum belt speed

Convevor Incline

- ± 20° from horizontal, fixed incline
- up to ± 30° with reduced accuracy

Conveyor Idler

- flat to 35°
- up to 45° with reduced accuracy

Idler Diameter

• 50 to 180 mm (2 to 7")

Idler Spacing

• 0.5 to 1.5 m (1.5 to 5.0 ft)

Load Cell

- construction: stainless steel with superior moisture protection
- excitation: 10 Vdc nominal, 15 Vdc maximum
- output: 2 mV / V excitation at rated load cell capacity
- non-linearity: 0.02% of rated output
- hysteresis: 0.02% of rated output
- non-repeatability: 0.01% of rated output
- capacity: maximum ranges: 50, 100, 250, 500, 750,1000 lbs.
- overload: safe 150% of rated capacity
- · ultimate 300% of rated capacity
- temperature:
 - 40 to 85 °C (- 40 to 185 °F) operating range
 18 to 65 °C (0 to 150 °F) compensated
- mounting dimensions: identical for all capacities

Hazardous Locations

with the use of approved intrinsically safe barrier strips

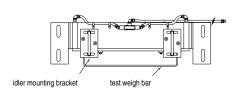

Weight

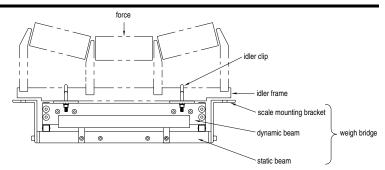

· see chart, Outline Dimensions section

Approvals

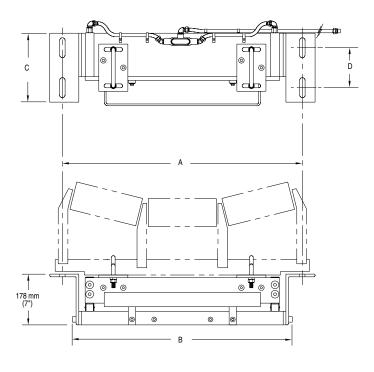

· CE compliant

Mounting

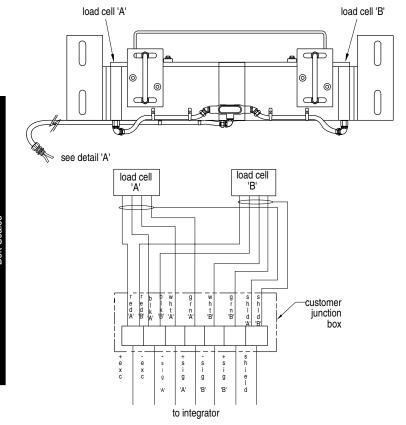

Specifications are subject to change without notice.

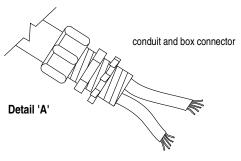

conveyor belt width	mounting scale width 'A'	minimum drop-in width 'B'	,C,	,D,	weight
