SITRANS LR250 (HART): Siemens Milltronics Process Instruments

Siemens has improved the efficiency of the software Electronic Device Descriptions (EDDs) by removing the Operating Instructions and reducing the EDD file size for download.

The manuals are available on the DVD included with your Siemens product, or can be downloaded from our website and added to your EDD by following the easy steps below:

1. To download the complete Operating Instructions, navigate to <http://www.siemens.com/sitransLR250>, and choose **Manuals / Operating instructions** in the **Technical Info** list.
2. To save the Operating Instructions on your local version of the EDD, overwrite the file

lr250_user_manual_ha_en.pdf found at the following location in the respective software installation directory (typically "C:\"):

For **SIMATIC PDM** -

C:\Program Files\Siemens\PDM\SIM_PDM\devices\HART\Sensor\Level\Echo\Milltronics\Sitrans_LR250\V3

For **AMS** -

C:\AMS\Devices\HART\000058\00d1

3. For additional product information, navigate to <http://www.siemens.com/sitransLR250>.
